ANAHEIM, CA 92807

# WILD ROSE REFURBISHING

The Wild Rose Motors Refurbishing Program allows for departments to continue utilizing their Ford Crown Victoria, Chevy Tahoe PPV or Ford Expedition SSV fleets. We consider our company and our refurbishing division a leader in the cutting edge refurbishing development, modification, and overall improvement of Law Enforcement Vehicles. Refurbishing vehicles are half the price of a new unibody vehicle, the enhancements and refurbishing itself may be classified as maintenance making it tax deductible.

We have improved braking and an enhanced ABS system by upgrading to high-performance DOT 4 racing brake fluid, which raises the boiling point of the brake fluid, making brake failure from overheating a thing of the past! We install a new Ford master cylinder and upgrade to cryogenic brake rotors and high performance brake pads.

We have improved cornering and traction with our upgraded suspension. We have a stabilized platform due to the components we install like high performance gas shocks, upgraded rear track bars, polypropylene bushings, and several other upgraded suspension components. The improved handling makes for considerably shorter stopping distances than standard vehicles and significantly reduces fishtailing and tire wear.

Each refurbished vehicle from Wild Rose Q11 comes with the best warranty in the industry. Ford & GM offer a 3 year unlimited mileage warranty on their remanufactured engines and transmission which can be used at any Ford or GM dealer in the U.S.!

We would like the opportunity to provide your department with our refurbishing service, which can be tailored to meet your fleets' needs. We pride ourselves on the restoration & refurbishing of existing fleets (while also "recycling" current fleets of reliable and safe police vehicles) - most departments are choosing to refurbish their existing Ford Crown Victoria Police Interceptor, Chevy Tahoe PPV, and Ford Expedition SSV Fleets as they know how dependable and safe these vehicles are.

## DC6 HD plus ALPR System

### THE MOST ADVANCED POLICE CAR CAMERA SYSTEM MEETS THE NEXT LEVEL OF ARTIFICIAL INTELLIGENCE

The Revolutionary DC6 HD in-car camera system now has an integrated ALPR System. While The DC6 HD camera maintains its high quality of durability, reliability, and clarity it's the ALPR System that separates our system from the rest with 2 versions of the same in-car system. The DC6 VI will run license plates only when the police car is stopped and stable, such as when a traffic stop is made. It searches its database to see if there is any possible hits, stolen vehicles, wanted suspects, etc. The DC6 V3 has 4 interdependent ALPR cameras, capturing real time license plates from every direction, and multiple lanes in real-time. V3 is able to GPS photo tag and map, allowing case building by engaging our Crime Analysis System Master Unit. The Headquarters Master Unit can send real-time license plate updates to VI and V3 versions in the field from 911 operators ensuring the officer has the most accurate and up to date Information.

### SOME KEY FEATURES

- ◆ Hands-Free Wireless Uploads
- ◆ Automatic High Speed File Transfers
- ◆ 1080 HD Video Quality
- ◆ Manufactured and Built in The U.S.
- ◆ Integrated GPS Locations
- ◆ Solid State Military Grade Technology

**CRIME CAM BODY CAMERA**

INTRODUCING THE MILITARY GRADE CRIME CAM BODY CAMERA AT A PRICE THAT FITS YOUR BUDGET. ITS RUGGEDNESS AND SIMPLICITY MAKE IT AN ELITE CHOICE WHEN DECIDING ON A BODY WORN CAMERA. - **REFURBISHING CAN ADD UP TO 15 ADDITIONAL YEARS TO DEPARTMENT FLEETS**
- **CAPABLE OF BEING REFURBISHED UP TO 3 TIMES**

## Full Refurbishment Program - \$22,500

### FORD CROWN VICTORIA POLICE P71 REFURBISHING INCLUDES THE FOLLOWING:

- **REMANUFACTURED ENGINE**  
3 YEAR UNLIMITED MILEAGE FORD WARRANTY
- **REMANUFACTURED TRANSMISSION**  
3 YEAR UNLIMITED MILEAGE FORD WARRANTY

### ENGINE/TRANSMISSION:

- Replace fuel injectors (if needed)
- Replace fuel pump
- Replace oil cooler lines
- Replace radiator
- Replace water pump
- Replace alternator & starter motor
- Replace serpentine belt idler pulley
- Replace AC Pump (if needed)
- Replace thermostat
- Check & replace battery
- Replace engine intake manifold
- Replace serpentine belt tensioner & belts
- Replace engine spark plugs
- Replace TPI Sensor
- Replace EGR Valve
- Replace any defective vacuum lines
- Test/replace engine & transmission mounts

### BRAKES:

- Upgrade to DOT 4 racing brake system.  
Increasing boiling point to 689°F
- New Ford master cylinder
- Replace brake lines
- Upgrade to cryogenic rotors and upgraded performance pads
- Replace ABS sensors (if needed)
- Replace flex brake rubber hoses x4

### SUSPENSION:

- New top and bottom A-Arms
- New Shocks
- Replace other bushings
- Full wheel alignment
- New sway bar bushings
- New sway bar A-arm connecting rods
- New bottom A-Arm mounting bushings to frame

### REAR END/DIFFERENTIAL:

- Replace spring buffer rubber inserts
- New bearings & seals
- New axle bearings & axles
- New driveshaft universal joints
- Reconditioned rear end
- New crown wheel & pinions
- New rear end suspension bars & bushings
- Track bars

### STEERING:

- Check & replace rack and pinion steering
- Replace tie rod ends
- Check & replace power steering pump
- Replace damaged steering rack boots
- Check column & replace worn parts (if needed)
- Replace any other defective/worn components
- Replace column shifter rod bushes

### INTERIOR:

- Check & replace damaged controls
- Reupholster front seats
- Repair/replace damaged flooring
- Check & replace door hinges
- Check & replace dash light bulbs
- Check & recharge air conditioning
- Remove any worn, broken, and defective wiring
- Replace broken/defective interior door panels, plastic moldings, seat belts, heating & A/C controls, glove box, and rear view mirror
- Check & replace window control buttons and central locking (if needed)
- Check & replace wiring, columns, and bushings

### MISC./OTHER SERVICES:

- Inspect exhaust mounts & replace
- Replace harmonic balancer
- Replace any damaged or worn hoses
- Replace damaged wiper blades
- New wheel studs & lug nuts
- Replace AC Fan Motor
- Replace gas cap
- Replace rear bumper clips
- Replace hood adjustment mounts
- Replace heater hoses
- Replace all radiator hoses
- Replace steering wheel
- Replace indicator and wiper control switch (if needed)
- Test & replace relays
- Replace power window operating switch (driver's side)
- Check & replace A/C fan control module
- Replace damaged dash glass

### INSPECTION AND TESTING:

- 3 part inspection including mechanical inspection, shop master technician, and independent third party master technician inspection with report
- Thorough road test and professional engine bedding-in process
- Rear inspection for leakage

### BODY WORK AND EXTERIOR:

- Minor body work and paint (one color) based on the customers specifications

## Full Refurbishment Program - \$29,000

### FORD EXPEDITION SSV REFURBISHING INCLUDES THE FOLLOWING:

- **REMANUFACTURED ENGINE**  
3 YEAR UNLIMITED MILEAGE FORD WARRANTY
- **REMANUFACTURED TRANSMISSION**  
3 YEAR UNLIMITED MILEAGE FORD WARRANTY

### ENGINE/TRANSMISSION:

- Replace fuel injectors (if needed)
- Replace fuel pump
- Replace oil cooler lines
- Replace radiator
- Replace water pump
- Replace alternator & starter motor
- Replace serpentine belt idler pulley
- Replace AC Pump (if needed)
- Replace thermostat
- Check & replace battery
- Replace engine intake manifold
- Replace serpentine belt tensioner & belts
- Replace engine spark plugs
- Replace TPI Sensor
- Replace EGR Valve
- Replace any defective vacuum lines
- Test/replace engine & transmission mounts

### BRAKES:

- Upgrade to DOT 4 racing brake system.  
Increasing boiling point to 689°F
- New Ford master cylinder
- Replace brake lines
- Upgrade to cryogenic rotors and upgraded performance pads
